

Ideas not able to implemented in STORC Dashboard:

- Login
 - Specifically CSUS Login
- User groups associated with Login and pages
- Outlook calendar functions on a calendar in application
 - Such as reminders and meetings
- More forms for the user especially the students
- More dynamic charts to be created
- Different types of widgets to be created
 - One that just has number read data in grid view
 - Color coded objects for health of a living thing
 - Warning lights for when things are not looking so well in a project
 - Resizable widgets
- Dashboard able to be saved to database with multiple ones and booted up for those users

To get the project for another senior project please contact Dr. Ahmed Salam at salema@ecs.csus.edu and let him know about the project
